

Security Incident Severity for Information Events

Use this matrix for data handling events (not market outages). Full row-level detail also lives in `tables/severity-matrix.csv`.

Levels

SEV-0: Confirmed export of MNPI or a production HSM secret. Page CISO and Bank Duty Officer immediately. Legal directs external notice. No ad-hoc emails.

SEV-1: Confirmed Confidential PII (full TIN or full account) in an unsanctioned tool, or ethical-wall breach. CISO on-call within 15 minutes. Privacy office within 1 hour.

SEV-2: Suspected mis-classification or the assistant returned a Restricted chunk to an uncleared role. Security lead same business day. Internal only.

SEV-3: Policy question or training gap, no evidence of leakage. Ticket only.

Handling

War-room number (fictional): +1-212-555-0199.

Do not paste suspected leaked payloads into the assistant to check if it knows them. Open a ticket with hashes, not raw secrets.
